RE: Pricketts Pond Sediment Sampling
and Analysis Program
CPS/Madison Industries
Old Bridge, New Jersey
(81-07188-06)

Dear Mr. Harvey:

We are pleased to submit our report entitled "Sediment Sampling and Heavy Metals Analysis, Pricketts Pond, Old Bridge, New Jersey."

This report, in conjunction with the Wehran Engineering report entitled "Investigation of the Extent and Distribution of Volatile Organic Priority Pollutants in the Sediments of Prickett's Pond, Old Bridge Township, Middlesex County, New Jersey" should provide the DEP with all of the results obtained during our joint referenced investigation. Converse was responsible for the collection and analysis of the heavy metals, and Wehran was responsible for collection and analysis of volatile organic priority pollutants.

If you have any questions regarding the results or our interpretation of the data, please do not hesitate to call us (201)226-9191.

Yours very truly,

CONVERSE CONSULTANTS, INC.
